

**Workshop on Food Contact Materials Testing
Center for ASEAN Food Contact Materials Testing
Department of Science Service (DSS) THAILAND
18 – 22 August 2014**

Introduction

Center for ASEAN Food Contact Materials Testing, Department of Science Service, Ministry of Science and Technology purposed to be an ASEAN Food Reference Laboratory for Food Contact Material in 2012 at the 15th meeting of ACCSQ-PFPWG held in Indonesia. For being an AFRL, one of the important responsibilities is to provide training in related field and being a resource center for food testing laboratory capacity building in ASEAN region.

Working Description

The five-day workshop provides information of regulations of food contact material in Thailand and European Union and theoretical and practical training focusing on food contact materials testing such as analyses of plastic and metal packaging. Technical information on sample preparation, method validation and quality control is also included. This training will be delivered in English. For more details of this workshop, please see schedule below.

Objectives

The participants will

- gain knowledge on updating regulations of Thailand and European Union and could share information of regulation(s) in their countries.
- gain knowledge on analyses of several food contact materials
- have the opportunity to visit testing laboratories for food contact materials

Workshop venue, and Expenses

Venue: The workshop will take place at Department of Science Service which located in Bangkok, Thailand.

Expenses: The host will provide the workshop without bench fee and lunch. Expenses for accommodation and transportation will not be included and must be paid by participants

Participants

Analysts from National Reference Laboratories (NRLs) of ASEAN Member States who are responsible for analysis of food contact materials will become priority participants. Only two participants from each member state who get the endorsement from national contact point (if possible) will be acceptable.
